Nguyen Trong Nhan

Web Developer

03/06/2002 | 0334323707 | ntnhan030602@gmail.com

Nam | Tan Chau, An Giang | https://nhan-dev-portfolio.vercel.app/

OBJECTIVE

Fullstack Developer (Next.js/Laravel) with a strong product mindset and hands-on experience in building scalable web applications. Skilled in designing efficient backend architectures, optimizing database queries, and delivering responsive, user-friendly frontend experiences. Passionate about collaborating with engineering teams to solve performance challenges, improve system reliability, and drive digital transformation initiatives for businesses.

EDUCATION

10/2020 - 03/2025

Can Tho University | Information Technology

- GPA: 3.4 / 4.0
- Graduation Project: Designed and developed a library management web application using the Single Page Application (SPA) architecture, enabling book borrowing, return tracking, and user management through an efficient and responsive interface.

WORK EXPERIENCE

05/2024 - 07/2024

Delta Brains JSC | Back-End Developer Intern

- Developed and maintained backend features using Laravel and MySQL for the company's web applications.
- Designed database schemas and built RESTful APIs to support frontend applications and system integrations.
- Collaborated with frontend developers to integrate APIs, process data, and support UI implementation using React.js.
- Diagnosed and resolved system issues, optimized database queries, and improved application performance and reliability.
- Participated in Agile/Scrum development processes, working closely with cross-functional teams to ensure project quality and timely delivery.
- Assisted in system deployment, testing, monitoring, and maintenance in production environments.

02/2025 - Present

Design24 | Full-stack Developer (Laravel, ReactJS, Next.js)

- Developed and delivered end-to-end web applications as a Full-stack Developer, handling backend development, frontend implementation, and production deployment.
- Designed and developed backend systems using Laravel, including RESTful APIs, business logic implementation, and MySQL database management.
- Built responsive and high-performance user interfaces with React.js and Next.js, focusing on usability, accessibility, and user experience.

- Designed database architectures, optimized SQL queries, and improved overall system performance.
- Deployed and managed production environments, including VPS configuration, web hosting, domain management, SSL certificates, business email services, and related infrastructure.
- Implemented technical SEO best practices, performance optimization, security enhancements, and scalability improvements.
- Analyzed business requirements, proposed technical solutions, and independently managed projects from development through production deployment.
- Maintained, enhanced, and troubleshot applications to ensure system stability, reliability, and continuous improvement.

SKILLS

- HTML5, CSS3, JavaScript (ES6+), TypeScript
- PHP, Laravel, RESTful API Development
- Git, GitHub, Postman, Apidog, Figma
- Domain & DNS Configuration, SSL Configuration
- ReactJS, Next.js, Responsive Web Design
- MySQL, Database Design, Query Optimization
- VPS Deployment, Linux Server Basics
- Technical SEO, Performance Optimization

CERTIFICATIONS

Coursera (02/2025)	Front-End Programming with ReactJS
Coursera (02/2024)	JavaScript Advanced
Coursera (06/2023)	HTML & CSS
Coursera (08/2023)	Responsive Web Design

PROJECTS

10/ 2025 - Present

DCT MART | Frontend Developer (ReactJS)
E-Commerce Platform for Smart Consumer Ecosystem
Project Overview
A large-scale e-commerce platform supporting customer management, membership programs, e-wallets, coupons, commission systems, promotional campaigns, and role-based business operations within a unified ecosystem.
Objective
- Develop a comprehensive online shopping platform that integrates member management and business policies into a single system.

Responsibilities
- Developed responsive user interfaces using React.js.
- Integrated and managed data from RESTful APIs provided by the backend team.
- Built advanced product filtering, search, and pagination functionalities for large datasets.
- Implemented business modules related to e-wallets, coupons, membership programs, commissions, and account management.
- Optimized user experience across desktop and mobile devices.
- Collaborated with backend developers to analyze requirements and implement complex business workflows.

Achievements

- Contributed to the development of a large-scale e-commerce platform with multiple business modules.
- Delivered complex user interfaces and data processing workflows supporting real-world business operations.
- Ensured frontend stability, maintainability, and scalability throughout multiple development phases.
- Successfully integrated membership, e-wallet, coupon, and promotional features into the platform.

Technologies

React.js, JavaScript, RESTful APIs, Tailwind CSS, Responsive Design, Git

05/2026 - 06/2026

AI-Powered Design & Media Learning Platform | Full-stack Developer

Project Overview

An online learning platform focused on AI applications in design and media, providing course management, student management, learning resources, and progress tracking within a centralized system.

Objective

- Build a modern E-Learning platform that delivers an optimized learning experience while simplifying course and student management.

Responsibilities

- Analyzed business requirements and designed the overall system architecture.
- Developed RESTful APIs and backend services using Laravel and MySQL.
- Built responsive and SEO-friendly user interfaces with Next.js.
- Deployed and maintained the production environment, including domain configuration, hosting setup, and SSL implementation.

Achievements

- Successfully delivered a production-ready online learning platform.
- Established an efficient workflow for course management and student administration.
- Improved page load performance and implemented technical SEO best practices to enhance search engine visibility and user experience.

Technologies

Laravel, MySQL, Next.js, React.js, RESTful APIs, Technical SEO, VPS/Hosting, SSL, Git

01/2026 - 02/2026

Can Tho Agri – Agricultural E-Commerce Platform | Full-stack Developer

Project Overview

An agricultural e-commerce platform connecting local producers with customers, providing product management, order management, and business information management within a centralized system.

Objective

- Digitize the promotion and commercialization of local agricultural products through an online platform.

Responsibilities

- Developed backend services and business logic using Laravel and MySQL.
- Built and maintained RESTful APIs to support frontend applications.
- Developed responsive user interfaces with React.js, ensuring compatibility across multiple devices.
- Deployed, monitored, and maintained the system in the production environment.

Achievements

- Successfully delivered product management and content management functionalities.
- Enhanced user experience across desktop and mobile platforms through responsive design and performance optimization.

- Deployed the platform to a production environment and ensured stable day-to-day operation.

Technologies

Laravel, MySQL, React.js, RESTful APIs, Responsive Design, Git, VPS/Hosting

07/2025 - 08/2025

Design24 Agency – Corporate Services Website | Full-stack Developer

Project Overview

A corporate website designed to showcase business services and generate qualified leads, with a strong focus on SEO performance, user experience, and conversion optimization.

Objective

- Develop a high-performance business website optimized for search engines and digital marketing activities.

Responsibilities

- Developed frontend features using Next.js and TypeScript.
- Designed and implemented responsive user interfaces across desktop, tablet, and mobile devices.
- Optimized Technical SEO, Core Web Vitals, and overall website performance.
- Deployed and maintained the website on a VPS environment, including domain and server configuration.

Achievements

- Built a high-performance website that achieved strong scores on performance evaluation tools.
- Improved search engine visibility through technical SEO optimization.
- Enhanced lead generation and conversion rates through optimized contact forms and user journeys.

Technologies

Next.js, TypeScript, React.js, Technical SEO, Core Web Vitals, Responsive Design, VPS, Domain Management, Git
